INSTALL NOTES

- **VanS must be updated to version 7.00.07**
- Download and expand the installer files
- Update the server PROGS with current vs programs
- Run VansSetup.exe on the server, or if no TS machine then a workstation
- Execute Vans once setup is completed.
- Complete the SQL updates (might need more than one if back a few versions)
- See the VanSvs 8.00 SQL script for full database change details

WARNINGS

- All users must be out of Vans Visual Suite to install
- If pre-7.00, must manually apply the contents of VanSVS7_PreUpdate.exe (attach database and execute sql script).
- If pre-8.00 see the server install notes for special checklist items.

ENHANCEMENTS AND FIXES

TYPE	ID	DESCRIPTION
Fixed	2457	The Help->About->Remote Help button now launches TeamViewer
Fixed	2458	Help->About->Support Call – Launches EWS client portal
Fixed	2459	Help->About now correctly references EWS name/web site
Fixed	2460	Contact Maint from SalesTrak now working correctly with default info
Fixed	2461	F1 for help has been removed in favor of Help->Help Contents or the ? button and help now launching in a web browser instead of the local HTML help viewer.
Fixed	2462	Van line invoice print not updating dates/times for V type
Fixed	2463	DMS viewer not always selecting image types correctly

OPERATIONAL NOTES

There are several changes around online help and support in this update as well as the noted fixes.

ONLINE WEB HELP

- The help has been changed to open in a full web browser now instead of the Windows HTML help viewer. This will allow for use of better styling and more features.
- The help can be accessed in one of three ways:
 - Within the application by select Help->Help Contents.
 - On any form that has the  button.
 - From www.ewsgroup.com by selecting Support->Vans Support->Online Help.
- The help has been re-themed for a unified, more-readable presentation.

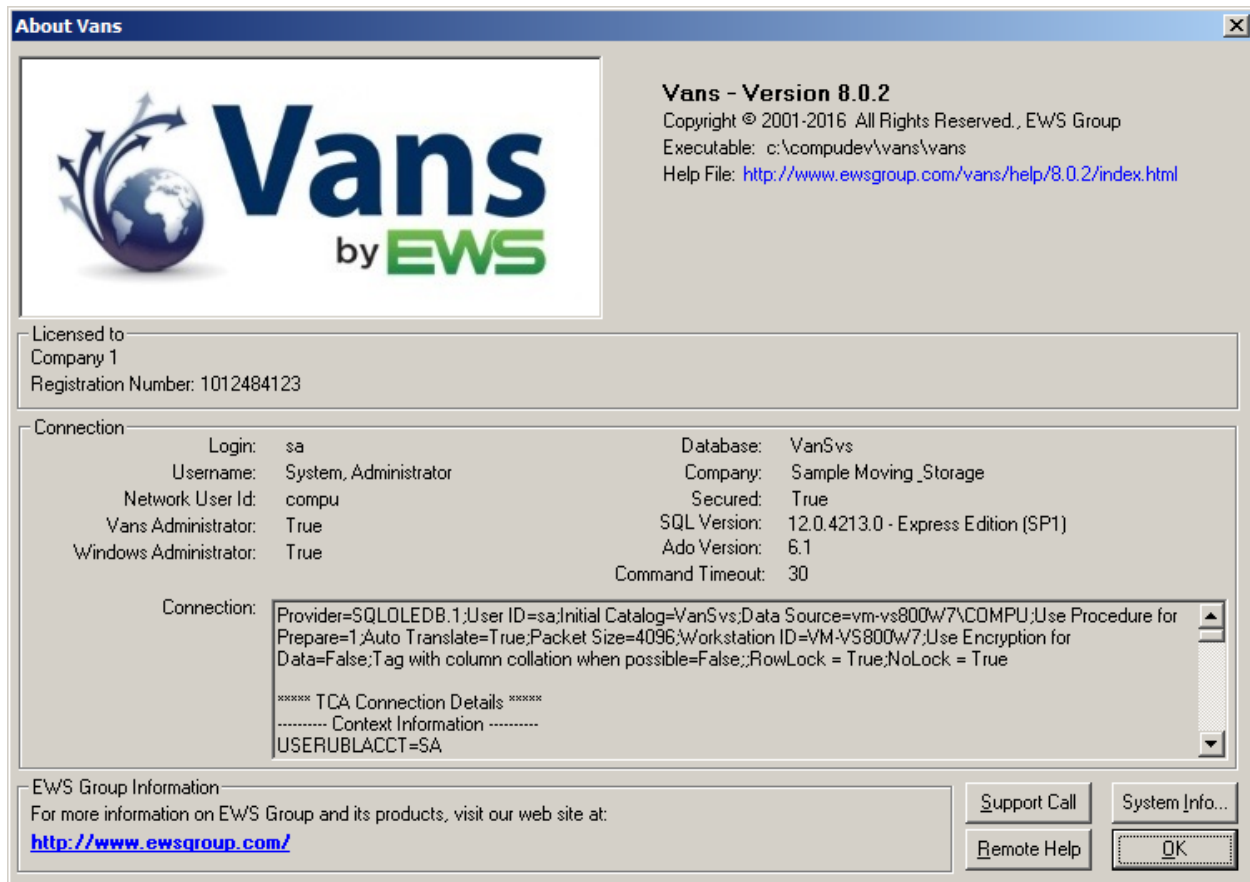

NEW SUPPORT AND REMOTE HELP OPTIONS

New features to add a support case and also remotely share your screen have directly been incorporation into the application.

On the Help menu, there are new options for Support Call and also Remote Help

These options also appear on the Help->About page

The Remote Help option will download the TeamViewer application and allow you to share your screen with a support person.

The Support Call option will take you to the customer portal where you can log in and add a new support case, or view the current status of any cases.
