INSTALL NOTES

- **VanS must be updated to version 7.00.07**
- Download and expand the installer files
- Update the server PROGS with current vs programs
- Run VansSetup.exe on the server, or if no TS machine then a workstation
- Execute Vans once setup is completed.
- Complete the SQL updates (might need more than one if back a few versions)
- See the VanSvs 8.00 SQL script for full database change details

WARNINGS

- All users must be out of Vans Visual Suite to install
- If pre-7.00, must manually apply the contents of VanSVS7_PreUpdate.exe (attach database and execute sql script).
- If pre-8.00 see the server install notes for special checklist items.
