

# What's New?

VERSION:

## 2025 September Release

For tips on how to use the [MSWarehouse Online Help](#), see the topic [MSWhse Online Help Tips](#). There is a video illustrating the best practices for its use there, as well!

### Enhancement: Functionality Update

**MSWhse is being updated to a more recent version of Angular.**

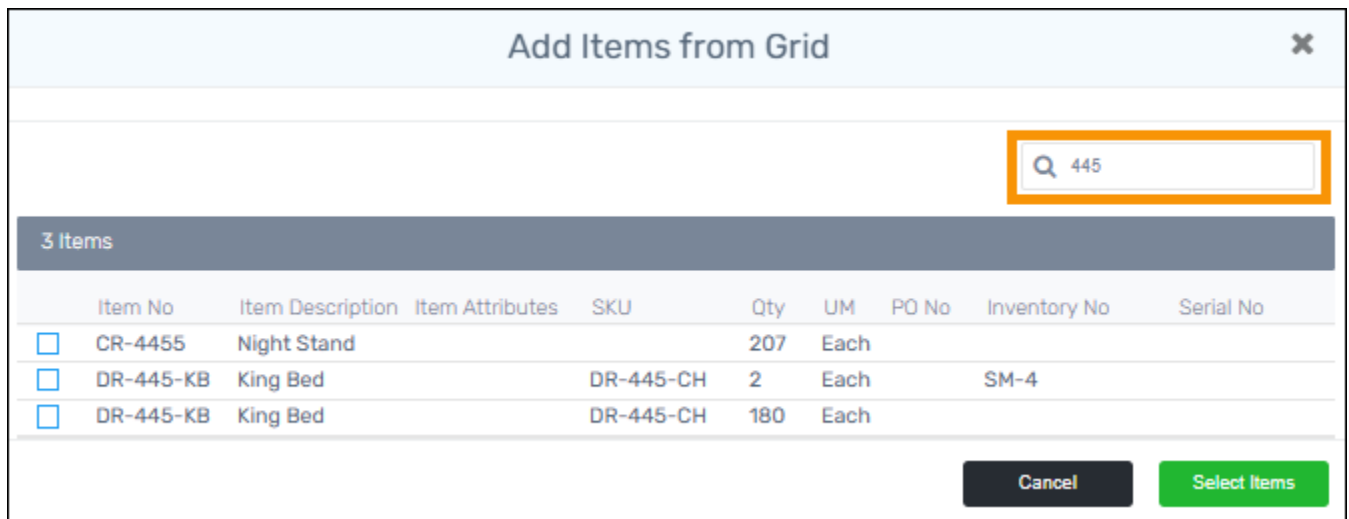

What is Angular? Angular is a tool that helps developers build websites and web apps. MSWhse is being upgraded to a more current version of Angular, making the platform faster, more secure, and simpler to update and maintain. This makes MSWhse even better for you!

### Enhancement: Transactions

**Search functionality is available within "Add Item from Grid".**

Within Outbound transactions, use the new Search within "Add Items from Grid" to filter by Item number, Item Description, PO Number, Inventory Number, and Serial Number.

The screenshot shows a dialog box titled "Add Items from Grid" with a search bar containing "445". Below the search bar, a table displays 3 items. The table has columns for Item No, Item Description, Item Attributes, SKU, Qty, UM, PO No, Inventory No, and Serial No. The items listed are:

Item No	Item Description	Item Attributes	SKU	Qty	UM	PO No	Inventory No	Serial No
<input type="checkbox"/> CR-4455	Night Stand			207	Each			
<input type="checkbox"/> DR-445-KB	King Bed		DR-445-CH	2	Each		SM-4	
<input type="checkbox"/> DR-445-KB	King Bed		DR-445-CH	180	Each			

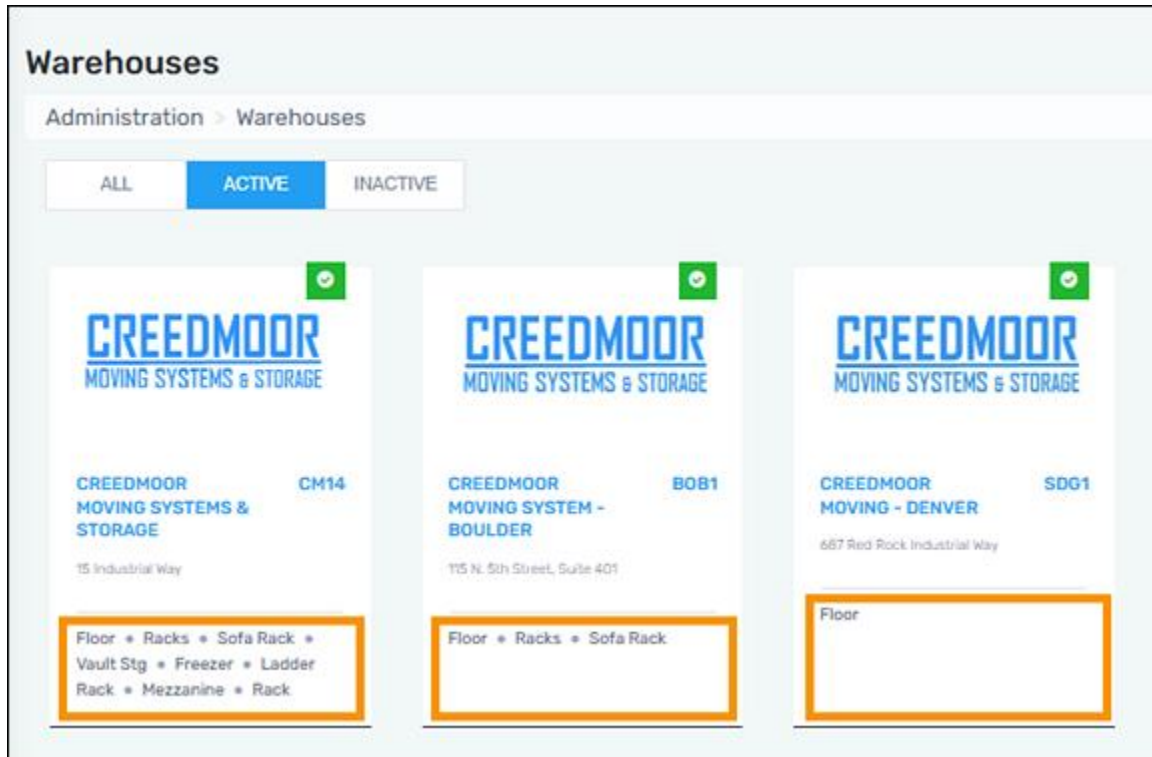

At the bottom right of the dialog box, there are two buttons: "Cancel" and "Select Items".

## Enhancement: Administration

Only active Locations show on Warehouse listings.

Within Administration > Warehouses, Warehouse information now only includes locations that are active and in use within that warehouse.

REFERENCE: WD-4332

## Fix: Transactions

### Processing Date is being incorrectly applied within Shipping Date.

When the Processing Date was different than the Shipping Date, the Processing Date was incorrectly populating the Shipping Date. This was affecting Outbound transactions, Pick Ticket by Item, and Pick Ticket by Location.

The screenshot shows a 'Pick Ticket' form for 'Transaction No: 930' from 'CREEDMOOR MOVING SYSTEMS & STORAGE'. On the left, there are two date input fields: 'Shipping Date' with the value '09/23/2025' and 'Processing Date \*' with the value '09/22/2025'. The 'Shipping Date' field is highlighted with an orange border. On the right, under the 'Shipping' section, the 'Shipping date: 09/23/2025' is also highlighted with an orange border. The 'Customer' information includes 'OLD WINE SHIPPING', 'Requested by: Alisha Alexander', 'Email: amalexander2251@yahoo.com', 'Phone: 7192055693', and 'Delivery PO No:'. The 'Shipping' information includes 'Carrier: UPS', 'Bill of lading:', and 'Time frame:'.

Figure 1: The Shipping Date is correctly reflected on the Pick Ticket.

## Fix: Transactions

### Shipping Date was not editable when editing an existing Transaction.

When moving a Requested Outbound transaction to Outbound Processing, or when editing an Outbound Processing transaction, the Shipping Date was no longer editable. With this fix, the Shipping Date is populated correctly.

## Fix: Transactions

### “Add Item from Grid” was not displaying all Items.

Due to a scrolling issue on the screen, only the first 50 rows of Items were listing within “Add Items from Grid.” When the list exceeded 50 rows, the additional rows were not accessible. The scrolling issue has been resolved and all Items can now be viewed using the scroll bar.
