Outbound Transactions

Inventory Number is included in Pick Tickets reports.

To assist in picking an item number that has an inventory number specifically requested, the *Inventory No.* column has been added to the “Generate Pick Ticket by Item” and the Generate Pick Ticket by Location” worksheets.

Rates

Rates can be ended within the last finalized billing period.

Before this fix, rates could only be ended within the current billing period.

To end a rate, from *Customers > choose Customer > Custom Rates tab*, click the edit button for any rate. Enter an end period for rate, which is shown as “June 2023” in the image below.

Notification Emails

The data grid would misalign within the Adjustment Notification Emails - if there was a blank field.

This issue was only noticed when one of the fields within the Adjustment Notification Email was blank. Notice the image on the left, is a correctly rendered email. The blank fields are indicated with a dash. In the incorrectly rendered email, as shown in the image to the right, the field that should have been left blank were populating with the data that should have been next lower in the column. Now emails are rendering with data correctly showing in their correct location, regardless of whether a field does not have data.

Warehouse Receiving Report

“Serial Number:” was being added to an Item Number description, even though it was not applicable.

If there isn't a Serial Number attached to an Item Number, “Serial Number:” should not print on Warehouse Receiving Reports as it isn't necessary. An example of the bug is shown below. Notice there isn't any information so it should be listed.
