MSWhse October 2023 Fixes

Apart from the cases documented below, (4) additional issues were resolved. Most of these were behind the scenes and not needed to be documented within these release notes.

Transactions: Outbound

Outbounding items that list under different Inventory Numbers on the same PO Number sometimes produced incorrect Available Quantities.

The correct Available Quantities will list for the Item Number requested by PO Number and Inventory Number.

INTERNAL REFERENCE:

WD-4058

Transactions

Errors were resulting when extra spaces were entered in PO Number field.

Mistakes happen. With this fix, blank spaces accidentally entered after the PO Number entry will be ignored. As an example, "CA251 " would be read as "CA251".

INTERNAL REFERENCE:

WD-4064
