MSWhse September 2023 Fixes

Apart from the cases documented below, an extra (8) issues were resolved. Most of these were behind the scenes and not needed to be documented within these release notes.

Item Numbers

Using different casing for the same Item Number caused errors.

MoversSuite now recognizes Item Numbers when different casings are used in different transactions. For example, MSWhse now accepts upper- and lower-case letters interchangeably within Item Numbers, such as "INV2023," "Inv2023," and "inv2023" which will all be identified as the same Item Number.

INTERNAL REFERENCE:

WD-4041

Transactions: Move Location

Move Location transactions that included vaults or pallets took too long to load.

These transactions are no longer slow and causing unnecessary delays.

INTERNAL REFERENCE:

WD-4043

Reports

Fixed an issue with expiration dates that caused inaccurate inventory reporting.

The issue wasn't caused by using expiration dates. The issue was based on the logic comparing dates in the background that could cause items to show on the report when they shouldn't.

INTERNAL REFERENCE:

WD-4025

Transactions: Inbound

Quantity fields and fields that accept numbers will only accept numbers and numbers using decimal points.

Negative numbers and special characters are not accepted.

INTERNAL REFERENCE:

WD-4019
