RELEASE SUMMARY

The following is a table contains counts of the items affecting this release.

#	Change Summary
2	Release Requirements
1	Known Issues
3	Release Enhancements
1	Release Fixes
5	Schema Changes (Database Schema Tables Affected)
2	Admin Changes
0	Standard Reports Affected

RELEASE REQUIREMENTS

Please read the following announcements regarding functionality and hardware/software changes for this release of MoversSuite.

IMPORTANT RELEASE REQUIREMENTS

MoversSuite is compatible with the following:

Microsoft Dynamics GP 2015 R2 (with ATIP Build 14.0.1)

Microsoft Dynamics GP ATIP Build 14.0.1

Refer to the following for information regarding additional requirements you may need to support Microsoft Dynamics GP 2015:

[System Requirements for Microsoft Dynamics GP 2015](#)

View the [MoversSuite Compatibility](#) topic for a list of products compatible with MoversSuite.

The following requirements are needed for this release:

Microsoft Dynamics GP 2013 R2 (with ATIP Build 12.0.23)

Microsoft Dynamics GP ATIP Build 12.0.23

Refer to the [Hardware Requirements](#) topic in our [System Requirements](#) for more information on the requirements for Microsoft Dynamics.

KNOWN ISSUES

The following issues are known problems that may affect your decision to upgrade to this version of MoversSuite. The following are not fixed for this release.

Citrix issue with phone number control

An issue that cannot be replicated is causing the phone numbers within the *Shipper Contact Information* section ([Name](#), [Address](#), [Phone](#) tab) to disappear and then reappear when a user clicks on that section, however, the user cannot edit them until they press Cancel (on the order) and then attempt to Edit again. (6409)

RELEASE ENHANCEMENTS

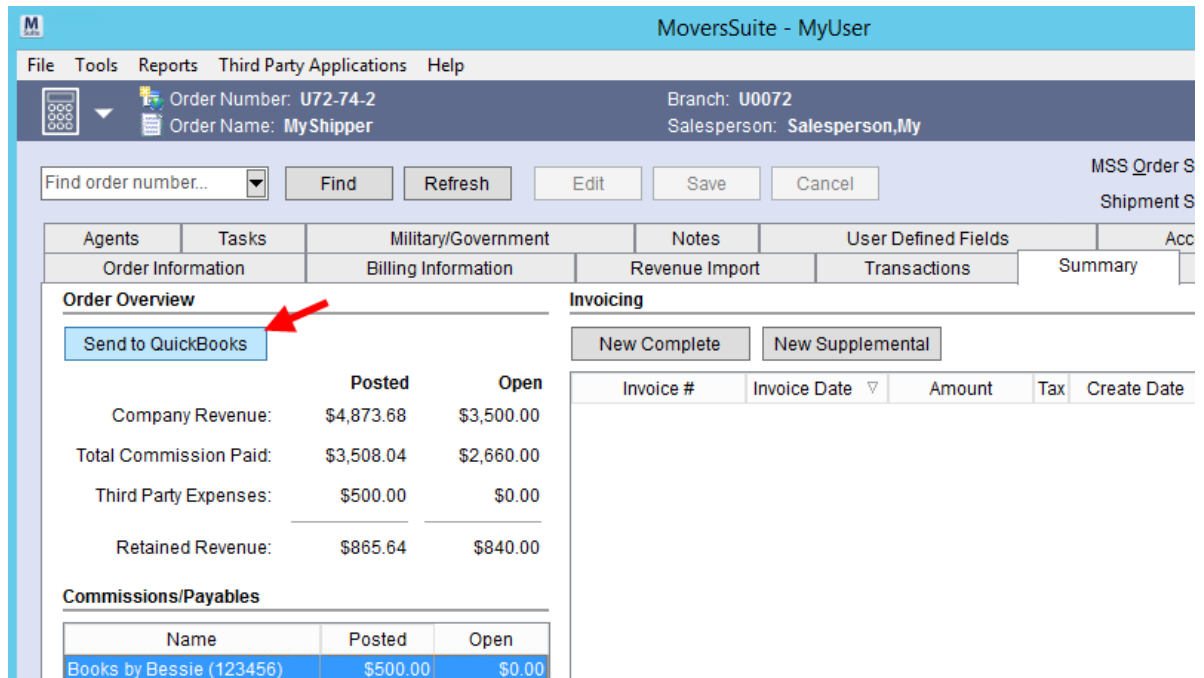

This section lists the enhancements made to MoversSuite for this release.

[VIDEO: MoversSuite 5.34 Overview Video](#)

Watch this video to see an overview of the changes we made at this release.

QuickBooks Integration

Moving companies that utilize QuickBooks Online for their accounting functions can take advantage of a MoversSuite integration that allows the company to create revenue items within MoversSuite and send them to QuickBooks for accounting transaction generation and other financial functions.

The screenshot shows the MoversSuite interface for a user named 'MyUser'. The top navigation bar includes 'File', 'Tools', 'Reports', 'Third Party Applications', and 'Help'. The main header displays 'Order Number: U72-74-2', 'Branch: U0072', and 'Salesperson: Salesperson,My'. Below this is a search bar for 'Find order number...' with 'Find', 'Refresh', 'Edit', 'Save', and 'Cancel' buttons. The interface is divided into several tabs: 'Agents', 'Tasks', 'Military/Government', 'Notes', 'User Defined Fields', and 'Acc'. The 'Summary' tab is selected, showing 'Order Information', 'Billing Information', 'Revenue Import', 'Transactions', and 'Summary'. The 'Order Overview' section contains a 'Send to QuickBooks' button highlighted with a red arrow. Below this is a table with columns 'Posted' and 'Open' for 'Company Revenue', 'Total Commission Paid', 'Third Party Expenses', and 'Retained Revenue'. The 'Commissions/Payables' section has a table with columns 'Name', 'Posted', and 'Open', listing 'Books by Bessie (123456)'. The 'Invoicing' section has buttons for 'New Complete' and 'New Supplemental' and a table with columns 'Invoice #', 'Invoice Date', 'Amount', 'Tax', and 'Create Date'.

Figure 1: Summary tab

SUMMARY (7548)

QuickBooks Integration is now available.

The following areas have been affected by this enhancement:

- QuickBooks Integration
- QuickBooks Integration Setup and Administration
- Schema Changes Version 5.34

Required Fields

Many of you have requested that MoversSuite provides a way to make certain data fields required for an order. With this release, your company can now define which fields must be set based on particular events that occur, such as creating or booking an order.

A new administrative setup area allows your company to define which fields it wants required at certain points in the workflow process. In the image below, the example illustrates that the Type of Move, Commodity, and Authority of the order must be set when the order is created.

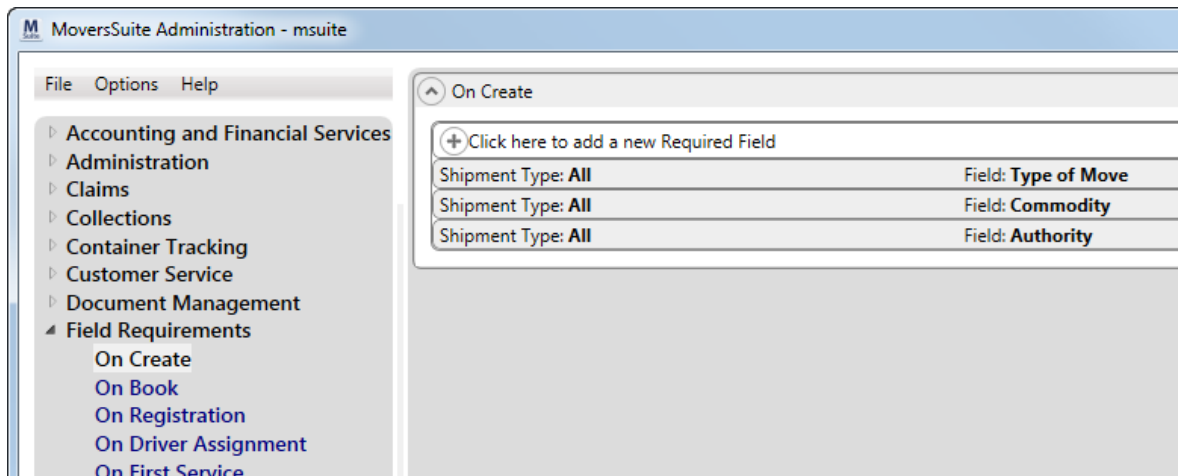

Figure 2: Field Requirements in MoversSuite Administration

When a user in MoversSuite attempts to create an order and any of these fields are not set, then the application returns an error dialog and highlights the required fields in red.

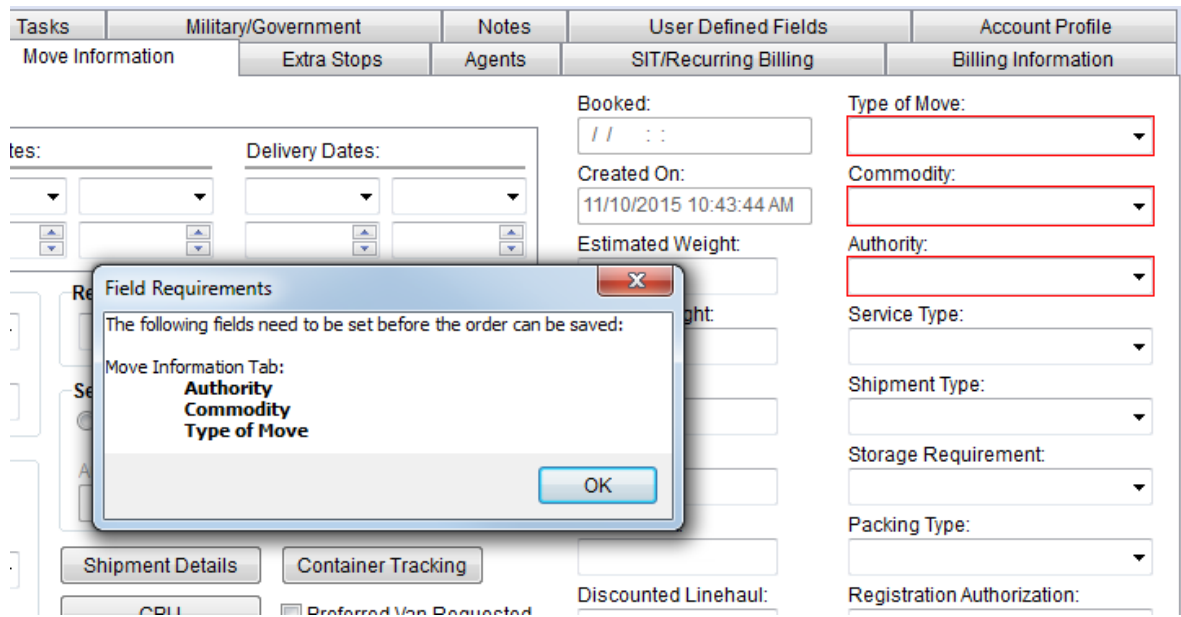

Figure 3: Field Requirements dialog and highlighted required fields

The requirements affect only orders managed through the move modules, such as Order Information and Revenue Entry. They do not affect imports from van line interfaces nor do they affect other API processes. Of note, once an order has been imported into MoversSuite, the field requirements do take effect.

There is no user security associated to [Required Fields](#) functionality.

Please see the [Required Fields](#) topic for more information.

SUMMARY (7634)

[Required Fields](#) is now available.

The following areas have been affected by this enhancement:

- Field Requirements Setup
- Required Fields
- Schema Changes Version 5.34

Container/Crate counts added to Local Dispatch

The **Dispatch Center** grid in **Local Dispatch** now displays the four new columns that capture the total count of order and service containers on the service as well as the total order and service crates.

Weight	Order Containers	Service Containers	Order Crates	Service Crates
	700	126	10	10
	700	75	10	

Figure 4: Dispatch Center grid

The following table describes the new columns added to Local Dispatch.

Fields	Description
Order Containers	Displays the count of the estimated cartons set for the order through the Update Containers, Packing and Unpacking screen accessed through the Move Information tab.
Service Containers	Displays the count of the estimated cartons set for the service through the Update Containers, Packing and Unpacking screen accessed through the Add Local Service screen (through the CPU button).
Order Crates	Displays the total of all crates specified for the order through the Update Containers, Packing and Unpacking screen accessed through the Move Information tab.
Service Crates	Displays the total of all crates specified for the order through the Update Containers, Packing and Unpacking screen accessed through the Add Local Service screen (through the CPU button).

SUMMARY (7727)

Four columns added to the **Dispatch Center** tab to document the total order/service containers and crates.

The following areas have been affected by this enhancement:

[Dispatch Center](#)
